*Dear Dr. Flowers,*

*I ran across your website and I thought you might be interested in hearing from a very happy former patient. To refresh your memory I was your patient way back in December 1975.*

*I was 31 years old and you did a breast augmentation and a chin implant for me. My augmentation was so successful that through the years when I go to a new doctor for a breast examine I have to tell them I have implants, they cannot detect them. Every time I am told that my "job" was the best they have ever seen. My implants have stayed soft, in place with no scars, and very natural feeling.*

*In the 28 years since my surgery I have never had a problem. I even had a child after my surgery with absolutely no problems. My breasts are so natural looking no one has ever guessed I have implants, I even forget I have them because they are just a natural part of me.*

*I will be 60 on my next birthday and even though my breasts have dropped with age I still would do well in a wet tee shirt contest. I just wanted to let you know that your excellent work has made my life more confident as a women, and I thank you for that gift.*

*Several times I have heard your name mentioned on the Oprah Winfrey Show and I keep hoping to see you on the show someday. With that I wish you all the best and if I ever plan on more work I will definitely be coming to Honolulu to see you.*

*Warmest wishes,*

*Gladys*
