

March 8, 2007

Dear Dr. Flowers,

It has been almost 8-months, since my Asian eye-bleph, which you performed last August. I want to send you warm regards for blessing me with a beautiful outcome. The change you gave me in my life is more than I would have imagined. I was fearful at first, however you felt my fear and acknowledged it stayed there to talk to me about the procedure. You are a true artist and I admire your work, as a surgeon, artist and as a person. I am humbled by your dedication to your work and your patients. You have helped me become more confident and that in return allows me to help others as an artist. Your staff is excellent and provided genuine and sincere care. Please send my regards to them.

Thank you for everything you are truly blessed.

Sincerely,
