

Dr. Flowers - I want to say again how good it is to *look in the mirror and see a person I recognize and not an old lady as I did before*. It makes a huge difference in my life to look the way I feel. I thought you would be interested in the enclosed photo of me at one-and-a-half years of age, with my low eyebrows and high forehead. The breast lift has been fabulous. I feel so comfortable now, and wish I could have had you do it years ago. I am delighted you are continuing your practice in Hawaii and look forward *to* seeing you this coming year. My **best** wishes to you and your family.
