

The Flowers Clinic  
677 Ala Moana Blvd. Ste.1011  
Honolulu, Hawaii 96813

I am writing this letter in gratitude for Dr. Flowers. I received Breast Augmentation at the Flowers Clinic, and now 5 years later, I am just as completely excited as when I first saw my new bustline. When I got my new breasts I couldn't believe how soft they were and how perfectly they balanced out my entire body. With every year that has passed, they have gotten even more beautiful in sight and in touch.

I have received countless compliments from friends, and my breasts have even been deciding factors for women who had reservations about the procedure. One friend in particular, wanted for many years to increase her bustline, but let the idea simmer on the backburner because of her concern for lack of a "natural look" or people saying she had a "boob-job." When she saw what Dr. Flowers had done for me, she had a new bustline within 7 months. I have other friends that have had breast augmentation from other surgeons, and their most common disappointment about their results, is the scarring. I have absolutely no scars, and quite honestly, even Dr. Flowers, upon a follow up, wasn't exactly certain where he had made the incisions. It is an amazing feeling when you can be just as confident naked as you are with clothes on.

One of the things that makes Dr. Flowers so special to me is how much he valued my trust for him as an artist as well as a surgeon. When I first had consultation with him, he asked me if I had a specific size in mind, and I had absolutely no idea. I was only sure that I wanted them to be bigger. I told Dr. Flowers that I wanted a noticeable enhancement, proportionate to my body, but I didn't want to look like I was going to topple over. At the end of the consultation we made no agreement on a specific cup size but his attentiveness was very much on my lifestyle, my physique and the overall look that I was trying to achieve. All the things that were important to me in respect to cosmetic surgery were equally important to him. Dr. Flowers valued my complete faith in him, in that he listened to what was important to me, and masterfully sculpted my breasts in a way that just complemented every part of my body. Looking in the mirror, I feel beautiful.

Based on my experience then and now, Dr. Flowers truly is a friend, an artist and a surgeon. Forever I will be grateful.
